

2003 MONTANA YRBS “DOUBLE A” SCHOOL RESULTS

Description of YRBS

The Youth Risk Behavior Survey (YRBS) was developed cooperatively by the Centers for Disease Control and Prevention (CDC), 19 other federal agencies, and state and local departments of education to measure the extent to which adolescent engage in health risk behaviors. The 2003 survey instrument consisted of 90 questions which assess the following six risk behaviors: intentional and unintentional injuries; tobacco use; alcohol and other drug use; sexual behaviors that result in HIV infection, other sexually transmitted diseases, and unintended pregnancies; physical inactivity; and dietary excesses and imbalances.

Sample Selection Process

All high schools in Montana were eligible to participate in the YRBS. One hundred ninety-eight school districts elected to participate in the 2003 YRBS. The frequency distributions detailed in this report represent 14 Class AA high schools and the 1,320 students in those schools that volunteered to participate in the survey. The results presented in this report are based on the behavior and opinion of the participants in the sample; because the survey was not random it is not possible to use the results of the survey to draw conclusions about health-risk behaviors of all Class AA high school students in Montana.

Survey Validity and Limitations

The 2003 Youth Risk Behavior Survey for Class AA high school students in Montana was not a random survey. It would not be valid to generalize the findings from this survey to all students of Class AA high schools in Montana. It is only valid to attribute the results of this survey to the 1,320 Class AA high school students who reported their behaviors in response to the items in the questionnaire. In addition, respondents in self-reported surveys may have a tendency to under-report behaviors that are socially undesirable, unhealthy, or illegal (alcohol consumption, drug use, seat belt nonusage, etc.) and over-report behaviors which are socially desirable (amount of exercise, etc.).

This 2003 YRBS data for Class AA schools is being released with the permission of the
local Safe and Drug Free Schools project coordinators
who commissioned the development of the Class AA Schools YRBS Report.
